Achieve higher fidelity video capture with CAE LearningSpace 4K

CAE LearningSpace, the most powerful video-enhanced debrief and simulation center management solution on the market, now allows you to capture simulated clinical experiences in high fidelity 4K resolution. Record every important detail of your training scenarios in crisp, high-resolution video for more effective learning. With an optimized video sub-system, LearningSpace offers you the lowest, live view digital latency available. Plug-in free, web-based and completely secure, CAE LearningSpace is your total end-to-end solution.

Your worldwide training partner of choice
New for 2019!

CAE LearningSpace continues to evolve into the only audiovisual-driven center management, debrief, and performance assessment tool your training program will ever need. LearningSpace has been redesigned for improved efficiency, saving you both time and money.

**Live Event Control**
Facilitate OSCEs in the blink of an eye with LearningSpace's redesigned control system that allows for multi-monitor viewing. Manage automated intercom announcements, organize video recordings and oversee the progress of learner checklists -- all with greater ease.

**Redesigned OEQS**
LearningSpace’s intelligent support for evaluation of open-ended question items submitted by your learners during an OSCE is now improved for an easier, more streamlined user experience.

**Inventory Manager**
Maximize your time and resources with LearningSpace’s Inventory Manager. Now, you can track the usage of your institution’s consumable and non-consumable items, and efficiently pre-order them, based on the volume of consumption.

**Additional Features**
- Seamless Site Management
- Enhanced Reporting Tools
- Effortless LDAP Integration
